

SUCCESS STORY

NAWCAD Lakehurst

ANALYGENCE is a trusted partner for mission support, cyber solutions, and management services. We specialize in achieving the goals and needs of government, military, and industry partners by leveraging our diverse backgrounds, applying our extensive management consulting expertise, and customizing solutions for each and every client.

ANALYGENCE personnel supporting Naval Air Systems Command (NAVAIR) were instrumental in helping the Navy reach its goal of 80% mission capable aircraft. This standard was set in 2018 by then Secretary of Defense James Mattis. It applied to the F/A-18 Hornet, Super Hornet and Growler platforms and the goal was to reach this level by FY19. At the time, the Super Hornet (F/A-18 E/F) mission capable rates hovered around 50%, which also represented a 10-year running average.

The PMA265 Principal Deputy at NAVAIR HQ offered his congratulations and gratitude for this concerted, cross-organizational effort, referred to as the Naval Sustainment System (NSS). ANALYGENCE assisted Naval Air Warfare Center Aircraft Division (NAWCAD) Lakehurst in taking a very aggressive, detailed and methodical approach to dig into every facet of the readiness universe, taking advantage of the expertise and lessons learned from commercial aviation. This achievement garnered a ceremonial ringing of the bell and we are proud to have been a part of it.
